Reference: EZEE Hoarding Inc. Temporary Hoarding System
Provincial Government Project

To Whom it May Concern,

With regards to the EZEE Hoarding system, we were asked to use this product on a project that has a high concern for safety, cleanliness, and noise, up until this time the owners were using either a steel stud and drywall or plywood system with poly or a tarping system, which really was not meeting the owners requirements.

This was my first time using this system and as we have completed several projects for this client in the past we were cautious on using a new system. However, we forged ahead and tried the EZEE Hoarding system, and to our joy, we not only found it to be user friendly, but also to live up to all of their claims (if not exceed the claims) on how quick and easy (ezee) it was to install while adding a safe environment and eliminating alot of previous dust problems we had using the previous systems noted above.

This system is so easy (ezee) to use I cannot believe it.

In my opinion this is the way hoarding should be it saves installation and prep time from the steel stud drywall system previously used, what took over 40 man hours can now be completed in less than 4 hours.

Yours truly

Amanda Barton
Site Superintendent
