

JULY FEATURE PROJECT

UBC STRANGWAY DENTAL OFFICE

Over 50,000lbs
diverted from the land
fills this month!

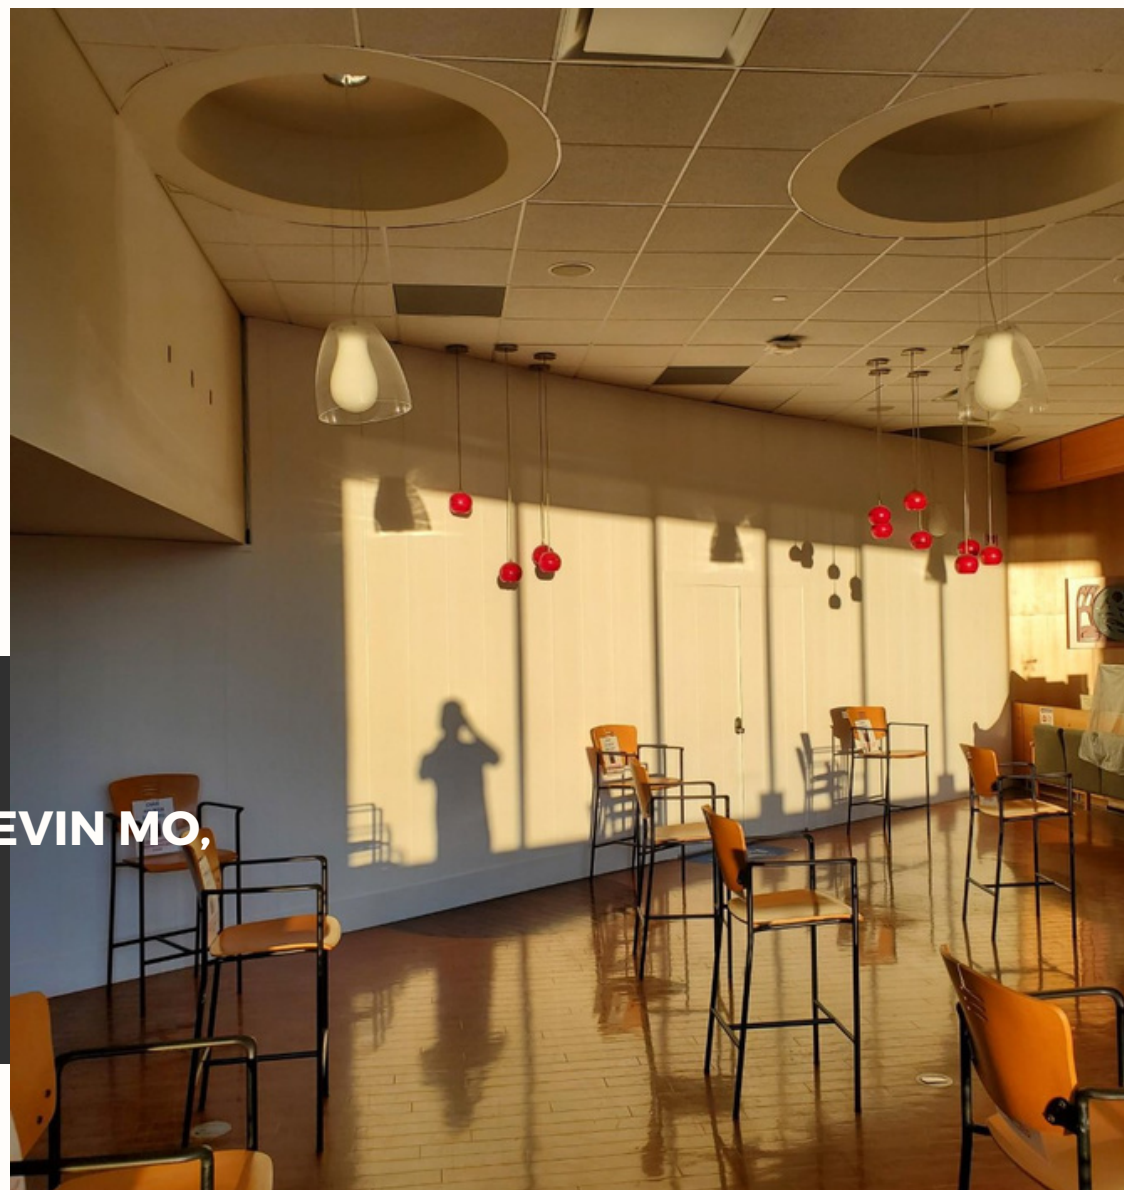

PICTURES DON'T DO THIS WALL JUSTICE

Renovation done by FMI

Mixed with the well decorated lighting, socially distanced chairs and a beautiful golden sunrise, we thought this project deserved some love.

A few things that stands out about this project to us is our wall just blends in so most people wouldn't even recognize that they are sitting right beside a construction site. It's a clean and finished product that can be wiped down easily, so that it meets that standards of the healthcare industry. And who doesn't like a good sunrise!

EZEE HOARDING Inc.
Reusable Construction Hoarding

INSTALLED BY KEVIN MO,
AND ALEX

CONGRATS TO THE TWO KEVINS

And the rest of the team

We still haven't figured it out ourselves, but for some reason Kevin Mi and Kevin Mo have been receiving top notch feedback.

From company's posting about them on their own social media accounts to having 2 different people write words in kind on their sign off sheet.

The extra effort and care our installers are giving out are not going unnoticed and we appreciate them thoroughly for their hard work! Congrats guys!

Congratulations

""Kevin & Kevin were punctual, a breeze to work with and great with accomadating working with the other trades on site. They finished the work quickly & were fun. We enjoyed their humour and humming!" -Jodie N Novacom

arborleadev Special shout-out to @ezeeharding for putting up this gorgeous hoarding wall! What we particularly love are the new door design that they have! It's almost like the door's not even there!! And the staff - today - #TheTwoKevins knocked this one out of the park! Thanks all!
